## **Abstract**

The development of legal rules and regulations is collateral to the stability of continuous developing society. Such development is crucial to avoid a gap between the society's developments on the one hand, and the rules regulating the needs of the group on the other hand. Hence, a fundamental need to Participate in developing a reliable legislative drafting approach that assists in securing a good and sophisticated law, capable of being stable and sustainable, reflecting the needs of the group, achieving social justice and assuring the rule of law becomes a must. This study is designed to shed light on the practical criteria for the soundness of the legislative drafting approach within the framework of the modern theories and tendencies in the setting up and drafting of draft laws on account of the necessity to realize the need to having clear criteria and methods for the drawing and drafting of the legislation. This study adopts the descriptive method for identifying the criteria of the sound legislative drafting, which can in turn lead to the .birth of a good legislation
