

HMCSR Applied Scientific Research Competition

Hamdi Mango Center for Scientific Research

(HMCSR)

Hamdi Mango Center for Scientific Research (HMCSR) is as an independent unit at the University of Jordan. HMCSR aims to provide financial and logistic support for applied and scientific research of interdisciplinary fields of science and technology.

The center consists of several scientific laboratories equipped with various updated instruments. These labs provide scientific services in different fields including: materials science and nanotechnology, Plant Molecular Genetics, Plant Tissue Culture, Molecular Microbiology, cell culture, virology, pharmaceutical processing, pharmaceutical solutions, and drug design and discovery.

HMCSR is looking forward providing scientific and educational environments for researcher to conduct their research by getting the center efforts focused on research, education, training, community services and international cooperation. Furthermore, the center attempts to narrow the gap between academia and industry providing opportunities for joint projects and translation the basic scientific research into applied research.

- 03 These projects must be applicable in the Jordan with the available capabilities, competencies and resources
- 04 This Competition is designed and implemented in partnership with Academia Industry Platform Co.Ltd (www.thejaip.com)

Competition Coordinators

Prof. Yasser K. Bustanji

HMCSR Director

Dr. Khaled Khraisat

JAIP CEO

Competition Terms

Applicants

1. Master degree students
2. Bachelor degree students
3. High School students

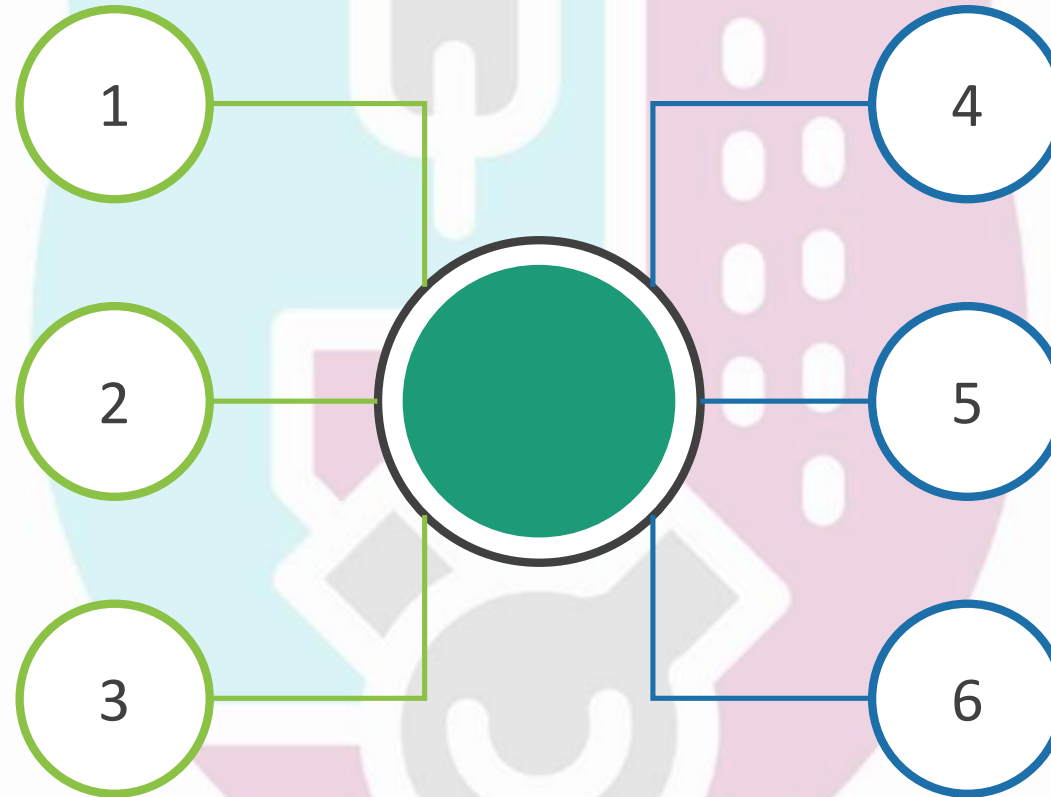

Not previously earned any competition or prizes

Team members

Two members and above

Researches Type

Applied Science

Sectors

1. Water Treatment
2. Green Technology
3. Healthcare

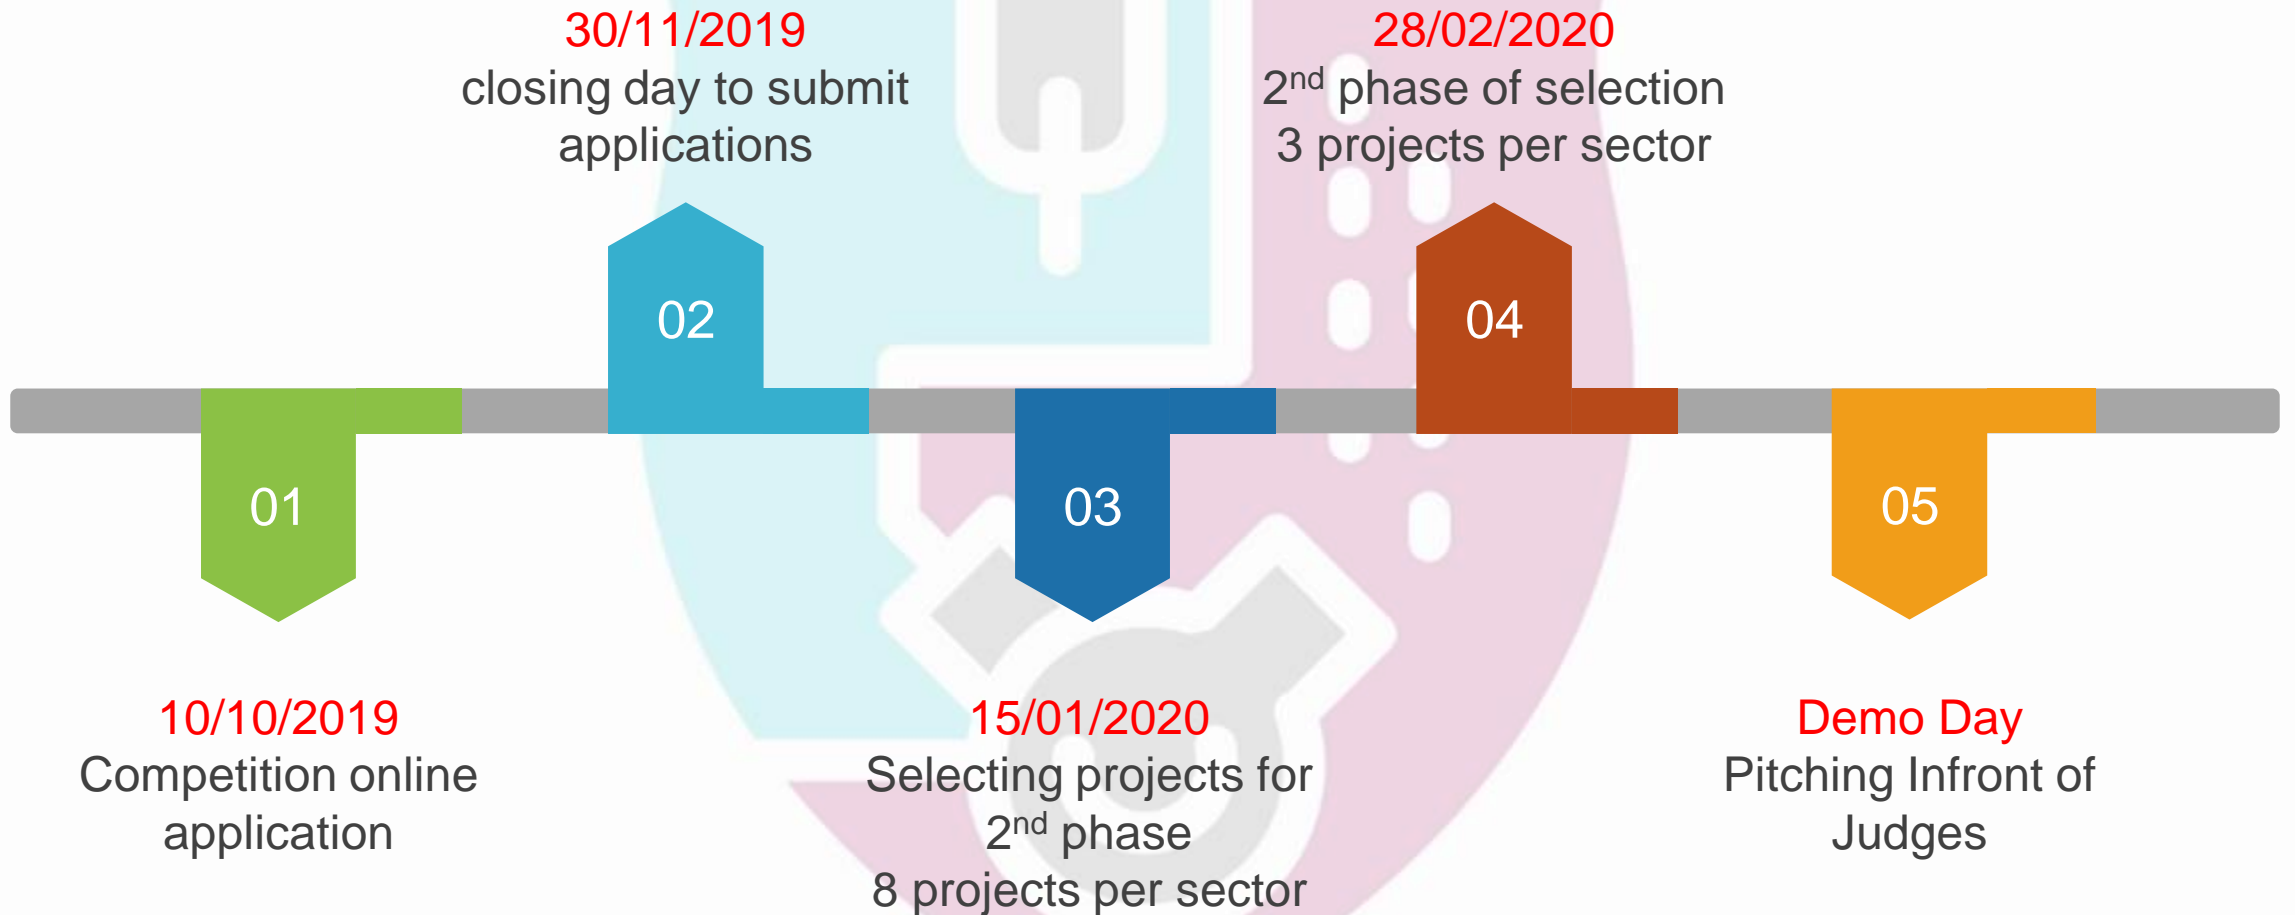

Project Phase

1. Idea Stage
2. Proof of concept
3. Advanced

Community

Have **community impact** locally & Might **improve quality** of life
